invisibility cloak for 9:30am lectures

~~price: \$50~~

EDIT: \$20, I didn't realize so many people had one already

I'm very unhappy with the mismatch between the number of students who got (near) perfect attendance credit and the number of people in the room. I was clearly overoptimistic about the general level of integrity among students, which I find kind of demoralizing.

A sunset over a body of water with a silhouette of a person in the foreground. The sky is a mix of orange, yellow, and light blue, with the sun low on the horizon. The water is dark with some ripples. The person's silhouette is on the right side, looking out over the water.

that feeling when you settle onto that one rock under the harvard bridge on the boston side as daylight fades and with the arch of the bridge framing your view your gaze drifts across mit campus and you stare over the mirror of slightly ruffled water tinted orange by the sun at the pale glow of the great dome and the blinking light on the green building and in that one moment you feel so far from it all and instead of dreary and gray it looks almost... beautiful?
